### Connections Never Cease to Amaze

In pursuit of better understanding of national ties, G.T. is proud to organize the flag-raising ceremony with its own well-trained scouts. Our students are not only encouraged to excel in territory-wide and international competitions, but they are also eager to cultivate their charitable hearts and humbly contribute to the community.

G.T. parents, despite the suffocating masks and exhaustion after work, grasped the opportunity to connect to each other and learn how to raise their kids better through the talk in September. G.T. alumni, though years are gone since their graduation, never hold back their grateful hearts but are keen to pass the torch to their successors, sharing invaluable work experiences and providing helpful study guidance for the to-be-graduates of G.T.

Though the world may be trembling in storms of political and social polarisation, we shall remain composed and unruffled. Though fear may threaten to tear us apart, we shall never cease to connect, as it is only through all of our tangible connections that we can stay firm, assured, and empowered.

# School Commencement Day and Prize-Giving Day (2021-2022)

Group photo taken in the Prize-Giving Ceremony

G.T. students were very excited on the first day of school after the summer vacation and the newcomers were eager to interact with their new schoolmates and explore the new environment. Our school principal, Dr. Raymond Tam, welcomed our new G7 students who joined our big family for the first time in the School Commencement Ceremony.

On the second day, the Prize-Giving Ceremony was held to honour students who had achieved excellent results in the previous academic year. Nine graduate representatives were invited to join the ceremony and receive the University Entrance Scholarships and Outstanding Scholarships, which were established to recognize their academic achievements in the HKDSE and the IBDP.

According to the official IB website about the top global International Baccalaureate schools, G.T. (Ellen Yeung) College scored 41.6 in 2021, ranking no. 10 with the coveted title "Global Top 10 IB Schools." The good news was announced after 25% of G.T. IB students had attained full scores (45) in the 2020-21 IB Diploma Program (IBDP) examinations. Congratulations again to the 2021 cohort of IB students! GT will continue its endeavour to provide top-notch education with the concerted effort of the management team, teachers, parents, and supporting staff members.

The success of our IB graduated classes is the fruit of concerted effort, including the determination and diligence of students, the guidance and instructions given by the teachers, the many solid suggestions and comments given by our Curriculum Director Prof. Rex Li and also the school Principal Dr. Raymond Tam, the supportive parents, and last but not the least, the Internal Exchange Programme of the school which has greatly increased and enhanced the international mindedness of G.T. students. Many thanks to all parties.

Dr. Vincent Tam

The thumbs up to the IB graduates (Cohort 2021)

Hoi Yan (12A) working on her Biology project

The IB education requires much more self-learning and discussions. Throughout my whole G11 and first term of G12, I have worked restlessly to complete that endless pile of essays and assignments. Not to mention we had to work like maniacs to achieve a decent predicted grade. I have crumbled under pressure more times than I could ever count, but experiencing the education of IB has undoubtedly sharpened my soft skills such as communication and critical thinking.

# 21st Century Cup Speaking Competition (2021)

For the past four years, the 21st Century Cup has provided students of GT a gateway to showcase their English competency as well as pitting their wits against top talents from around the territory.

Contestants must each prepare a five-minute speech and are subjected to a random question related to the theme, and this is where the challenge lies: an impromptu speech of two to three minutes.

Zhena Tse (9A) and Christie Leung (8D) have both swirled through the rigorous preliminary rounds, the semifinals and reached the Regional Finals with flying colors. Both were awarded accolades, out of the 1000 strong participants.

I would like to take this opportunity to express my gratitude to English teachers for their dedicated training, GT parents for your trust and time, and the management of GT for their continual support.

# Prefect Team Training (2021)

In the afternoon on 9 July 2021, 43 G8 to G10 students who would be prefects 2021/22 attended the Law Forum organised by the Hong Kong Federation of Youth Groups and the Law Society of Hong Kong. Mr. Rimsky Yuen, former Secretary of Justice, and Ms. Melissa Pang, President of the Law Society, shared their views on the rule of law and law abidingness with teenagers. In the Forum, our potential student leaders learnt the importance of law abidingness and the consequences of violating laws.

# MI School Series: Po Leung Kuk Lam Man Chan English Primary School

With the support from Professor Li and Principal Tam, Dr Clara Cheng, together with the Vice-Principal Mr Benny Lai, visited Po Leung Kuk Lam Man Chan English Primary School on 7 October 2021. The afternoon with the school principal, Ms Man Sze Wing Jessica, and her senior management team had been a gorgeous one.

Mr Benny Lai kicked off the MI presentation with GT's school background and achievements in different local and international assessments, while Dr Clara Cheng continued the sharing with GT becoming a research school with a focus on the diversity of cases and approaches as well as its inquiry-based projects initiated by teachers or students.

The pick of the day was the exchanges and discussion among all the participants. The conversation gate once opened seemed to resist closing. Questions ranged from the gigantic benefits of developing the multiple intelligences inside students to teachers being the MI DOI (Direct Object Identifier) for the students.

An afternoon in the conference room with the LMC school team conveys a crucial message: Like GT, LMC English Primary School sees MI as a fast track to nurturing **YES: Youth of Excellence-Joy-and-Satisfaction**.

## Parents' Talk – How Science Helps with the Development of Children

The past two years of online learning have left many parents overwhelmed and worried. The usual stress and strains of parenting have been intensified by the pandemic lockdowns. The frequent parental burnouts have definitely worsened the relationship between parents and children. It also leads to a follow-up question on how children learn to deal with disruptive emotions and impulses. Therefore, Dr. Susan Su Xiqing, Lecturer and Associate Director of Social Work Practice and Mental Health Centre (HKBU), revisited G.T. College on 28th September 2021 for a parents' talk about how science helps with the development of children. Over 90 parents from G7 to G8 were intrigued to know how children's emotional development is built into the architecture of their brains. Dr. Su also introduced a family board game on resolving arguments with children in an interactive way. All participating parents enjoyed the activities while discussing how to improve their children's emotional intelligence.

# G7 Integration Programme (2021)

All hands up in Campus Treasure Hunt 2

The G7 Integration Programme was successfully held on 17 August 2021. Through ice-breaking activities and Campus Treasure Hunt, students were more familiar with the school environment. Those activities encouraged the interaction between G7 students and their class teachers. Students developed a closer relationship with their classmates and met a lot of new friends. All G7 students experienced a fruitful and cheerful moment that afternoon.
